

ADVANTAGES

- Track and manage print and copy costs
- Simplify allocation of document costs to specific users, departments, budgets or funding sources
- Control access to MFDs and track color and black and white usage*
- Increase user productivity with Follow-You™ printing
- Protect confidentiality with Secure Document Release

BENEFITS

- Plugs into your existing network
- Easy to use
- Full data security in the event of power outages
- Space-saving compact design
- Supports PIN, magnetic card, contactless smart card, campus card authentication

Flexible Control Terminal for Equitrac Office and Express

Increasing control over the costs of copying and printing is one of the easiest ways for budget-constrained organizations to save money, eliminate waste, enhance user productivity and protect confidentiality. Equitrac PageCounter® can help.

Equitrac's compact and flexible terminal for print and copy control integrates into existing networks and mounts directly on most devices. Used in conjunction with Equitrac Office for business or Equitrac Express for education, PageCounter provides a complete solution for print and copy tracking, access control, cost reduction and document security.

With an easy-to-use keypad and optional magnetic card and contactless smart card readers, PageCounter helps to limit equipment access to authorized users and purposes while accurately charging document costs to the correct user, department, funding source or budget.

This virtually effortless user authentication also increases document confidentiality. Equitrac's Follow-You™ Printing solution increases productivity by printing documents through a centrally managed server and then securely releasing from the print queue only when users authenticate themselves on the PageCounter terminal at their printer of choice. Users can just as easily re-route their output to avoid printers that may be busy or out of service.

Standards-based for seamless integration, PageCounter features Windows® CE embedded applications, real-time TCP/IP communications, LDAP authentication and dual Ethernet ports allowing connection of both the terminal and a networked multifunction device in a single network drop. Offline flash storage capability assures capture of copier usage when network services are unavailable.

Flexible design makes it easy to configure PageCounter to your needs.

Versatile, modular, and user-friendly, PageCounter fits into any environment.

ADVANCED FEATURES

PageCounter is a versatile, modular, and easy-to-use control terminal that works in conjunction with Equitrac Office and Equitrac Express software solutions to track walk-up copy and print jobs.

By requiring account code entry to access output devices, PageCounter simplifies the control of color equipment* and supports charging of variable rates for color,* black and white, and other document attributes. Document costs are easily allocated to the correct user, department, budget or funding source.

PageCounter also supports the use of magnetic campus cards, and acts as a point of sale for student copying and printing. With just a card swipe, students can authenticate themselves then follow the simple instructions to release print jobs, make copies and pay for output from their campus accounts.

Offline capability ensures no lost data and continuous operation in the face of network service outages.

PageCounter integrates output devices from multiple manufacturers into a single network, enabling you to leverage existing investments to new levels of efficiency and make more informed purchasing decisions.

PageCounter Terminal

PageCounter Terminal with Optional Keyboard

* Requires MFDs with detailed attribute interfaces.

Usability Features

- Easy to read 4 line display
- 3 soft keys for easy usability

Software Features

- Configurable IP address (BOOTP or static)
- Supports PIN, LDAP, ID card and campus card authentication

Hardware Features

- 10/100 Ethernet port
- Dual Ethernet ports offer mini-hub functionality
- 128 MB CompactFlash data storage for offline capability
- Adjustable mounting bracket for wall or table mounting
- Optional QWERTY keyboard with separate numeric pad
- Optional track 2 (magnetic swipe) card, proximity card and contactless smart card internal readers
