NSI AUTOSTORE

A SOPHISTICATED
INFORMATION
WORKFLOW SOLUTION

The average organization makes 19 copies of each document, has a labour intensive process to file each document, and loses one out of every 20 documents. There is no doubt that manual document driven business processes are expensive, inefficient and time-consuming. With NSI's three-pronged approach of capture, process and route, you can solve your document driven business automation problems easily and confidently.

BUSINESS CHALLENGES

> My users spend too much time processing documents – **Can these tasks be automated?**
> My employees lose valuable time moving and renaming documents to electronic stores – **Can I have a simple interface for quick user interaction?**
> Managing data archiving and document capture is complicated and time consuming – **How can I fully automate this process to free up my IT overhead?**

YOUR ADVANTAGES WITH NSI AUTOSTORE

> Cuts costs – Automates labour-intensive manual storage and data entry tasks.
> Agility and speed – Instantly distributes documents to all nominated recipients.
> Productivity – Frees time previously spent on repetitive manual processes.
> Efficiency – Simplifies internal processes and improves document workflows.
> Compliance – Secure, rules-based document processing eliminates human error.

MANAGE YOUR DOCUMENTS EFFICIENTLY

NSI Autostore automatically converts, indexes and files documents then stores the information in target applications. Autostore can capture information from virtually any paper or electronic device, including MFPs, copiers, desktop applications, emails, faxes, scanners and more. The solution also handles advanced document components such as OCR and can recognise and process barcodes and forms.
