KYOCERA has developed these new A4 colour devices, designed specifically for small and medium-sized work groups, offering both reliability and fast output speeds. Both devices are equipped with a convenient touch panel which increases their usability by providing direct access to the numerous functions available as standard. Document workflow can be further optimised using dedicated program keys and KYOCERA's integrated HyPAS platform. KYOCERA's exceptional long-life components ensure low running cost and reduced impact on the environment.

ECOSYS stands for ECOlogy, ECONomy and SYStem-printing. With their long-life components, ECOSYS devices are designed to maximise durability and minimise the total cost of ownership with regard to maintenance, administration and consumables. The cartridge-free system means toner is the only consumable for the first 200,000 pages. The modular design concept allows you to add workflow-enhancing functions as required. Integrated system software provides long-term cross-network compatibility
